FOR VACUUM
TECHNOLOGY

BALL BEARINGS FOR TURBO MOLECULAR PUMPS

- Full analysis capability
- Special materials and ceramic balls for optimum life
- Superior vacuum greases
- Optimized grease positioning
- Low vibration design
- Super finished raceways for optimum life
- Special harmonic raceway limits for low vibration
- Engineered cage designs for reliability and lubrication life
- Application specific integrated designs
- Advanced sealing and shielding options
- Proven field experience
- Dedicated project team to support application through every step

ABOUT GRW

GRW: Worldwide Leading Supplier and Manufacturer for Ball Bearings

One of our company's goals is to fulfill our customers' needs regarding their demand for specialized ball bearings. That is why we offer customized and individually manufactured ball bearing solutions alongside our many standard solutions. We design and manufacture the perfect ball bearing for our customers' most specific applications, even for use under extreme conditions.

Facts and Figures

Based in five countries and serving customers on five continents – over the past 80 years, GRW has evolved into a true global player. We develop specialized, high-precision ball bearings and solutions for a wide range of business partners across several industries. Our sustainable company growth is reflected in the following facts and figures:

Products:

Beyond our standard product lines, our company offers millions of possible product variants manufactured in batches ranging from ten to one million pieces. We create new ball bearing solutions inspired by the clients specific interests.

Locations:

German headquarters and European production sites in Germany and the Czech Republic

Sales & distribution:

GRW sales managers are located all around the globe. In addition to Germany and the UK, we have offices in the United States and Singapore.

Staff:

About 600 employees manufacture our special bearing solutions and hence implement the company policy of GRW. In order to produce our custom-made innovations, we rely on their experience, their know-how combined with the latest technology.
